Profile

Junior Backend Developer specializing in Laravel & PHP, with experience in building scalable web applications, RESTful APIs, well-structured database designs, and dynamic admin dashboards using Filament. Skilled in database modeling, relationships, and normalization, Blade templating, real-time features using Laravel Echo, Pusher, and Firebase, and writing clean, maintainable code. Motivated to grow and contribute to impactful backend solutions within a collaborative team environment.

Education

Bachelor of Science in Computer Science	2022 – 2026
Modern Academy Senior (4th year) student specializing in Backend Development with PHP & Laravel, Algorithms, and System Design. GPA: 3.51	Cairo, Egypt

PROFESSIONAL EXPERIENCE

Training PHP Development IT-Gate	07/2024 – 09/2024
Completed professional training in PHP (OOP) and backend development , gaining hands-on experience through real-world projects.	cairo, Egypt
Laravel Developer Code Craft	12/2024 – 02/2026
Developed and maintained Laravel web applications with RESTful APIs, Blade , and real-time features using Echo and Pusher.	Giza, Egypt
Laravel Developer softigital	Present
Developed and maintained Laravel web applications with RESTful APIs, Blade & Filament dashboards	Giza.Egypt

Skills

Technical Skills

- **Languages & Frameworks:** PHP (OOP), Laravel Framework
- **Core Laravel Features:** Routing, Eloquent ORM, Middleware, Queues, Blade Templating, FilamentPHP (Admin Dashboards)
- **Payment Integration:** Experience with Payment Gateways (e.g., Stripe, PayPal)
- **API Development:** RESTful API Design & Integration, Postman (Testing & Documentation)
- **Authentication & Authorization:** Laravel Sanctum / Passport
- **Database:** MySQL, Database Design & Optimization
- **Version Control:** Git(GitHub,Bitbucket)
- **Front-End Basics:** HTML, CSS, JavaScript

Architecture Patterns

- MVC
- Clean Architecture

Projects

Hotel Management & Reservation System

Laravel-based Full-Stack Web Application

- Developed a full-featured hotel management system with real-time interaction between guests and admins.
- Implemented key guest features: room browsing with detailed info, real-time reservations, booking history, blog, gallery, and contact forms.
- Built an admin dashboard for complete content management (rooms, blog, gallery), real-time chat (Pusher), and direct email replies via Gmail SMTP.
- **Tech Stack:** Laravel (PHP), MySQL, HTML, CSS, JavaScript, Bootstrap, Pusher, Gmail SMTP.

Car Service Management & E-commerce System

- Designed and developed a complete car service and e-commerce platform with admin and user interfaces.
- Built an interactive admin dashboard (Filament) and full CRUD management for products and services.
- Developed a user panel featuring authentication, product browsing and purchasing, service booking, reviews, contact forms, and a smart cart system.
- Integrated Paymob for dual payment options (Cash/Card) and implemented real-time delivery tracking with location auto-detection.

Restaurant Management & Online Ordering System

- Developed a comprehensive web platform to streamline restaurant operations and enhance customer experience.
- Created an admin dashboard for real-time order tracking, product/category/offer management, table reservation handling, and dynamic delivery fee setup based on user location.
- Designed a user interface with features like advanced menu browsing, cart and favorites, online ordering, reviews, and direct table booking.
- **Tech Stack:** Laravel (PHP), MySQL, HTML, CSS, JavaScript, Bootstrap.

Multi-Vendor E-commerce Platform, (Freelance)

- Developed an admin panel (Filament) for managing vendors, categories, platform settings, sales analytics, and vendor approvals.
- Implemented a vendor dashboard with product and inventory management, order tracking, and sales analytics.
- Created a customer interface supporting product browsing by vendor/category, secure checkout with dynamic pricing, order tracking, and product reviews.
- **Tech Stack:** Laravel (PHP), MySQL, Laravel Sanctum (API auth), Filament (admin UI), Postman (API testing).

coptichymnsschoolE-Learning Platform, (Freelance)

- Developed a bilingual e-learning platform supporting English and Arabic for users in Egypt and the USA.
- Implemented location-based pricing using `stevebauman/location` for automatic regional pricing.
- Built a smart notification system for course purchase approvals and rejections.
- Created a customizable admin dashboard with theme and color control via Filament Admin Panel.
- Delivered a scalable and modern web solution integrating Flutter UI with Laravel backend services.
- **Tech Stack:** Flutter Web (Frontend), Laravel (Backend), FilamentPHP

Elegant Steps E-Commerce Platform, (softigital)

- Developed a men's clothing e-commerce system with full order and delivery management via Filament dashboard.
- Implemented a custom delivery control panel for assigning and tracking deliveries.
- Added a notification system to update users on order status in real time.
- Built a customizable product feature allowing users to personalize and print designs on T-shirts.
- Designed an admin dashboard using FilamentPHP for complete control over orders, products, and users.
- **Tech Stack:** Laravel, FilamentPHP

Creat Home – Custom Home Design Platform, (softigital)

- Developed a custom home design system allowing users to personalize house layouts and design details.
- Integrated PDF generation for final design previews and detailed order summaries.
- Implemented automated email delivery sending the generated PDF to users after customization.
- Built an interactive Filament dashboard for managing homes, designs and users
- **Tech Stack:** Laravel, FilamentPHP

Wahb – Blood & Organ Donation SOS Platform, (freelancer)

- Designed and developed the backend architecture for a real-time emergency platform connecting patients, donors, and hospitals.
- Built RESTful APIs in Laravel to handle SOS blood and organ donation requests, including validation, status lifecycle, and role-based access.
- Implemented intelligent location-based hospital matching, automatically assigning the nearest hospital using GPS coordinates.
- Developed role-based dashboards using Filament, including:
 - Super Admin Panel for hospital and system management.
 - Hospital Panels to review requests, confirm patients and donors, and finalize donation processes.
- Implemented secure confirmation workflows, ensuring donations are completed only after hospital approval.
- Integrated Firebase Cloud Messaging (FCM) for real-time notifications on request creation, donor acceptance, and status updates.
- Designed relational database schemas and optimized queries for donation requests, users, and hospitals.
- Implemented API authentication and authorization using Laravel Guards and Policies.
- Added bilingual (Arabic/English) backend localization support.
- Ensured data integrity, request tracking, and audit-friendly status transitions.
- **Tech Stack** :Laravel, Filament, Firebase

Twintip – Sports Training Booking Platform, (softigital)

- Architected and developed a scalable backend system for managing sports training bookings between coaches and athletes.
- Implemented a secure authentication and authorization system using OTP, Google OAuth, Laravel Sanctum, and Spatie Permissions.
- Built an advanced booking engine supporting private sessions, group sessions, seasonal subscriptions, waitlists, and guest management.
- Designed a flexible slot and scheduling system with multiple states, capacities, pricing, and automatic slot reactivation.
- Applied Strategy, Service Layer, and Repository patterns to handle multiple booking types and business rules.
- Integrated payment systems supporting online and on-site payments, coupons, discounts, and coach payouts.
- Developed a skills and level tracking system with automatic progression and approval workflows.
- Implemented a multi-channel notification system (Firebase Push, SMS via Twilio, Email) with reminders and user preferences.
- Built coach and athlete management modules, including parent-child accounts, availability tracking, and performance monitoring.
- Developed a comprehensive admin dashboard for managing users, bookings, skills, approvals, and system analytics.
- Integrated QR-based check-in, background jobs, scheduled tasks, and Excel data export.
- Ensured high performance and reliability using queues, caching, event-driven architecture, and optimized database design
- Tech Stack**: Laravel, Firebase

Season App – API-Based Travel Management System, (Freelance)

- management.
- Built RESTful APIs to manage travel bags, groups, trips, reminders, and geographical guides.
- Integrated Google Gemini AI 2.0 to analyze bag contents, detect missing or unnecessary items, and optimize bag weight.
- Implemented a real-time group tracking system with GPS location sharing, distance calculation using the Haversine formula, and SOS emergency alerts.
- Developed a smart notification system using Firebase Cloud Messaging combined with Laravel Queues and Scheduler.
- Built a professional admin panel using Filament, supporting full system management with bilingual (Arabic/English) and RTL support.
- Designed and optimized relational database schemas with complex relationships and efficient query performance.
- Implemented authentication and authorization using Laravel Sanctum and role-based access control.
- Ensured data integrity, security, and maintainability through validation layers, service architecture, and clean code practices.
- **Tech Stack**: Laravel, Firebase, filament
